

**Flexible, fully managed  
co-working lab space at  
Babraham Research Campus**

Access state-of-the-art equipment, flexible membership terms and connection to one of the most vibrant life science ecosystems in Europe.

## LiveLabs at Babraham Research Campus

Fully managed labs for early-stage life science ventures.

### What is LiveLabs?

LiveLabs is a dedicated shared laboratory facility designed for early-stage life science companies to hit the ground running.

Located at the heart of Babraham Research Campus - one of Europe's most dynamic bioscience ecosystems - LiveLabs offers a unique blend of flexibility, infrastructure, and community to support the growth of high-potential start-ups.

Whether you're generating early data, validating a concept, or preparing to scale, LiveLabs gives you the space and support to get there faster.

### Accessing the LiveLabs difference

Our fully managed and equipped labs are ideal for molecular biology and cell culture work and offer the opportunity to share, learn and network with other co-founders and CEOs who are both 'doing it now' and 'been there, done it before'.

## What is included?

### Fully Equipped Laboratories

- Molecular biology & cell culture ready.
- Class II safety cabinets, CO<sub>2</sub> incubators, real-time PCR, plate readers, fluorescence microscope & more.
- Cold storage, autoclave, purified water, glasswasher, dry ice.

### Serviced Lab Support

- PPE & laundry.
- H&S, waste management, training.
- Equipment maintenance.

### Office & Meeting Space

- Shared desk space.
- Wi-Fi, breakout areas, AV-equipped rooms.

### Flexible Memberships

- Start from as little as 3 months.
- Scale up as your needs evolve.

### LiveLabs members benefit from the wider Babraham Research Campus experience:

#### Access to exceptional expertise and equipment at the Babraham Institute:

Including flow cytometry, genomics and imaging.

#### Access to tailored events and mentoring:

- Workshops, talks and mentoring activities, specifically devised to increase knowledge and confidence across all aspects of growing a successful life sciences company.

#### Access to impact:

- Being located on Campus accelerates company fund-raising by an average of at least 6-months + by 20% more\*

*"LiveLabs gives us access to cutting-edge equipment in a cost-effective, collaborative environment. The shared lab model keeps us agile, while the supportive community and world-class ecosystem at Babraham have opened the door to exciting funding and partnership opportunities."*

**Dr Carina Kern, CEO & Founder, LinkGevity**

*"LiveLabs offers unbeatable value for early-stage companies like ours - flexible access to lab space, essential equipment, and a strong, supportive community. It's enabled us to carry out high-quality research without the overheads of a full lab."*

**Dr William Bains, CSO, Five Alarm Bio**
